

Hamidreza Farhadipour

Data Scientist | M.Sc. Student in Data Science | B.Sc. in Statistics

hrfpour@gmail.com · farhadipour.com · github.com/hrfpour · Tehran, Iran

SUMMARY

M.Sc. Data Science student and B.Sc. Statistics graduate (Allameh Tabataba'i University, GPA 18.74/20), relying on statistical inference and predictive modeling to solve data-driven problems. Hands-on research experience in advanced statistical analysis, machine learning, and deep learning — running the full data-analysis cycle from missing-data handling to feature engineering, training, evaluation, and model interpretation. Thesis: enhancing reliability in traffic forecasting by integrating spatio-temporal graph neural networks with Bayesian approaches.

EDUCATION

M.Sc. in Data Science - Allameh Tabataba'i University (ATU), Tehran

Oct 2024 - Present

- GPA: 18.74 / 20
- Thesis: Enhancing reliability in traffic forecasting by integrating spatio-temporal graph neural networks with Bayesian approaches

B.Sc. in Statistics - Allameh Tabataba'i University (ATU), Tehran

Sep 2019 - Jul 2024

- GPA: 15.98 / 20 | Core coursework: statistical inference, regression analysis, data mining, machine learning

EXPERIENCE

Teaching Assistant - Allameh Tabataba'i University (ATU), Tehran

Graduate studies

- Programming with R - led hands-on R sessions, reviewed assignments, and supported students with data manipulation, visualization, and statistical computing.
- Sampling Methods - prepared exercises on sampling designs (simple random, stratified, cluster) and estimation, and graded coursework.

SELECTED PROJECTS

- Time-Series Modeling & Forecasting - ARIMA/SARIMA selection, diagnostics, accuracy benchmarking (Dr. Salehirad, Jan 2024).
- Hybrid SQL + NoSQL Database Architecture - workload-to-store mapping and cross-store query benchmarking (Dr. Shiri, Jan 2025).
- Comprehensive Data Analysis - clustering & classification pipeline with missing-data handling (Dr. Rezaie Tabar, Feb 2025).
- Bayesian Email Spam Detection - Multinomial Naive Bayes with TF-IDF features (Dr. Eskandari, Nov 2025).
- Pistachio Image Classification - transfer learning with modern CNN architectures (Dr. Moein, Dec 2025).
- Evolutionary vs. Swarm Algorithms - GA and PSO implemented from scratch and benchmarked (Dr. Shahbeik, Jan 2026).

SKILLS

- Programming & Databases: Python (Pandas, NumPy), R, SQL, SPSS, Git & GitHub, Jupyter, LaTeX
- ML / DL: Scikit-learn, PyTorch, PyTorch Geometric (GNNs), CNNs & transfer learning, ARIMA/SARIMA, Naive Bayes & ensembles
- Statistics & Data Mining: inference, hypothesis testing, clustering & classification, feature engineering
- Data Engineering & Viz: SQL/DBMS, MongoDB (NoSQL), missing-data handling, Matplotlib, Plotly, ggplot2

CERTIFICATES

- International: Machine Learning Specialization (DeepLearning.AI & Stanford Online) | Data Analysis with Python (IBM) | SQL for Data Science (UC Davis) - Coursera; ML Track (Kaggle Learn)
- University: Machine Learning & Data Mining course certificates (ATU) | Advanced Python (Sharif University of Technology - Maktabkhooneh)

LANGUAGES

- Persian (native) · Azerbaijani Turkish (native) · English (professional working proficiency)
